Video Description. Adding engine coolant (also known as antifreeze) to your 2008 Audi A4 is pretty easy. Engine coolant circulates through your engine to keep it cool in the summer but won't freeze in the winter. Make sure to check your engine when it is cold for an accurate reading. The video above shows you where the coolant reservoir in your A4 is located and how to add coolant.

Coolant: Pentosin Pentofrost or Audi G12?

A coolant leak can happen in any car. It is when your coolant leaks from the coolant reservoir, generally straight through the engine and onto whatever surface you're parked or driving on.You often discover this when your Audi has a low coolant light go off or your engine begins to overheat.You may also discover a coolant leak by seeing coolant pool up under your car.
