tcpdump usage. Avoid using "proto" as filter. "proto" will only check the IPv6 header's "Next Header" field and the NH field of a fragment header. Use "protochain" instead. Avoid the use of tcp[] / icmp6[] / udp[] use 'ip6' instead of 'ip' and 'icmp6' instead of 'icmp' (ip and icmp are IPv4 only)

IPv6 Pocket Guide - SANS Institute

Chapter 7 Troubleshooting TCP/IP TCP/IP Introduction As an interesting side note, the seven-layer model actually came about after TCP/IP. DARPA used a four-layer model instead, which the OSI later expanded to seven layers. This is why TCP/IP doesn't generally fit all that well into the seven-layer OSI model.
